QUALITY POLICY

1. OVERVIEW

Established in 2008 Core HS offers integrated health, safety and wellbeing solutions to the mining, oil & gas, marine and private industries. Specialising in injury prevention packages and training (RTO: 51887), industrial emergency response, safety and medical teams and supporting services and infrastructure.

2. POLICY

Core HS assures all clients that the company is committed to providing services consistent with the expectations and needs of each individual client.

The company backs this assurance by the implementation of a quality management system which will provide clients with the confidence that:

- All contractual obligations and programs are met and satisfied;
- Objective evidence of compliance with the specified contract requirements is produced;
- Client needs and expectations are understood;
- All employees of the company are responsible for providing quality services; and
- Subcontractors and suppliers engaged by the company comply with the direction and policy of the company's quality system.

In order to meet these objectives, Core HS will implement these measures:

- Core HS will self-monitor and evaluate our quality compliance by undertaking audits, inspections and performance reviews;
- Independent verification audits will be scheduled to provide advice on the performance of Core HS Management systems;
- Core HS will maintain appropriate resources to ensure compliance with quality management specifications; and
- Core HS will review this policy annually to reflect organisational performance.

Core HS's quality management system has been developed to suit the specific needs of the company and its clients, in accordance with the requirements of ISO 9001:2015. This is particularly relevant for the provision of onsite services where quality, health, safety and environmental duty of care is paramount.

The Core HS Board and management fully supports and endorses the quality management system, as described in the company Quality Management Plan (CORE-MAN-005-CIMS).
